Harish K

Frontend developer

✉ ksharishcs20@gmail.com   🖵 [Portfolio](#)   [in] [harish-k](#)   ○ [harishkuppusamy](#)

A fresh graduate with a strong foundation in frontend development, currently upskilling in Full-Stack web development

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, C

Frameworks, Libraries & Databases: React, Tailwind Css, API

Tools & Other Technologies: Git, Postman, Netlify, Vercel

WORK EXPERIENCE

Freelance   **Jan 2025 - Present**
Frontend Developer
- Working independently on real-world UI projects with a focus on responsive design and user experience.
- Engaging in component-based development using modern JavaScript frameworks and CSS utility libraries.
- Specializing in component-based architecture using React, enabling scalable, reusable UI components

PROJECTS

Task Management App *- HTML, CSS, React, Tailwind, React-Router, Vercel*
- Developed a feature-rich task management application enabling users to add, edit, delete, and filter tasks in real time.
- Utilized React with functional components and Hooks (useState, useEffect) for efficient state management and UI updates.
- Applied React Router to implement dynamic routing and support seamless navigation between task views
- Ensured accessibility and user-friendly interactions, including form validation, interactive buttons, and intuitive layout.

Code: [Github Repo](#)   Demo: [Live Preview](#)

Personal Portfolio Site *- HTML, CSS, Javascript*
- Designed and built a fully responsive personal portfolio to showcase projects, technical skills, certifications, and contact details.
- Used semantic HTML and modern CSS techniques to structure and style the site with a clean and professional layout.
- Integrated vanilla JavaScript to enable smooth scrolling, interactive UI elements and section-based navigation.
- Focused on mobile-first design, ensuring the site performs well and looks great on all screen sizes.
